Engineer Support

Configured and deployed 1,000 Wi-Fi routers

Configured and deployed 1,000 Wi-Fi routers, improving network accessibility and performance for clients.

2003 – 2014

1,000

Wi-Fi routers configured and deployed

Situation. Clients needed wireless that just worked, and that came down to configuring and rolling out a large number of Wi-Fi routers — and doing it the same careful way every time, because a router set up sloppily is either insecure or slow, and usually you find out which one later.

Task. Configuring and deploying those routers to give clients better network access and performance was the job.

Action. A thousand Wi-Fi routers got configured and deployed. The trick at that number is standardising the setup — a consistent, secure, sensible configuration — rather than tuning each one from scratch on the day, because a thousand hand-crafted routers is a thousand different things to support later. So they were set up for security and performance the same way each time, and rolled out reliably across client sites.

Result. The thousand routers gave clients dependable wireless — better access, better performance — and did it consistently, because the setup was standard rather than improvised. A router nobody has to think about again is the goal; most of these got there.

Bring this experience to your project

Use “Configured and deployed 1,000 Wi-Fi routers” as a starting point for a similar challenge in your organisation. The services behind this work are available for your project. The laptop, the printer, the login and the mailbox, sorted quickly and in plain language, without anyone feeling foolish.

Need reliable networks across many sites?

Talk through your project with the engineer responsible for delivery. We agree the scope, price basis and handover in writing before work begins.

Role context: System Administrator / IT Consultant. It draws on Infrastructure, Reliability & Backups, Networking & VPN, Security and System Administration. And while you are here, we are rather good at System Administration, Networking & VPN Setup and IT Support & Helpdesk.
