Engineer Support

Testimonials

Recommendations, reference requests and the engineering record behind Engineer ApS, with company work and founder experience clearly distinguished.

You can assess Engineer ApS through the work record, selected cases and the public sources for recommendations about our founder. They answer different questions: the work record describes delivery; a colleague's recommendation describes working with the person behind it.

Read recommendations in context

A founder recommendation concerns the person and the working relationship it describes. The case record explains the project contribution and its engagement context; neither should be read as an endorsement of work outside that scope.

How testimony is handled

A quotation is published here only with permission, in the author's original words and language, with its attribution and source. Founder recommendations remain labelled as such; they do not become client endorsements of Engineer ApS. Our own case descriptions remain our account of the work.

We can discuss relevant experience and ask whether a suitable contact is willing to speak with you. An introduction depends on that person's consent and availability. Client names and contact details are shared only with permission.

Discuss the evidence for your project.

Put collaboration in context

Use published recommendations about working with our founder and relevant work to assess a possible collaboration.

Read recommendations about working with our founder

Read what the named authors say about working with our founder, then examine the project evidence relevant to your goal.

Read recommendations about working with our founder Get in touch →

For a reference request, name the service or project you are considering, its planned scope and what you would like to learn about delivery.

Discuss the work, **agree the next step,** then decide how to proceed.

Tell us your goal and timing so we can agree scope, responsibilities and price before work begins.

Discuss your project What we offer →

Understand who did the work

Use the engagement context in a case to distinguish company delivery, the founder's experience and the outcomes recorded for that work.

See what it costs Get in touch →

Discuss delivery

Discuss responsibilities, documentation and handover before choosing an engagement. Its scope and terms are agreed in writing.
